

SUPPORT SOHO HOSTED EXCHANGE - Wireless Option

Highlights

- ✓ Expand your capabilities with instant wireless synchronization of your email and calendar to your mobile device
- ✓ Your email finds you. No dialing in, no modem to attach, no antenna to raise; no effort is required
- ✓ Scheduling on the fly allows you to initiate, accept or decline meetings with comments on alternative times
- ✓ Monthly low-cost, per user billing
- ✓ Both Blackberry and Windows devices with ActiveSync capabilities are supported

Hassle free wireless access without the investment

Staying in contact and with your customers, suppliers and colleagues while on the go can be a challenge. With Support Soho's wireless option you can easily get the large enterprise experience of wireless integration to email without the need to invest in the infrastructure to support it. Fully integrated with our Hosted Exchange services, SUPPORT SOHO's wireless option allows your email and calendar to be updated for you no matter where you are; on the road, at home or on the golf course. You can book meetings, respond to meeting requests and get access to your personal organizer all without having to do a thing; your information is updated automatically. You'll never be overbooked, out of date, or out of touch!

With Support Soho's Wireless Option, you have access to two mobility solutions fully integrated with our Hosted Exchange infrastructure. Select the *device you want (or already have) to access through Microsoft's ActiveSync and RIM's BlackBerry Enterprise Server in a fully synchronized solution. Our integrated environment ensures that your mail, calendaring and important information are synchronized with your Exchange environment giving you information you need, wherever you are.

Superior Performance

We take capacity management seriously to ensure the right kind of performance for our mobile customers and scale our infrastructure accordingly. Industry wait times may be 2 minutes or much longer; this is unacceptable to us. We allow you to keep on top of your business without excessive delays, from wherever you are. We take care of all the complex back end details to give you the wireless solution that you need.

* Check with your service provider to ensure the Windows device can be wirelessly synchronized with Microsoft Exchange 2003
